Mabini Colleges Inc. 2013 – 2017

## // PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer and Shopify Specialist with 7+ years of combined experience building corporate web applications, custom CRM platforms, and high-converting e-commerce storefronts. Expert in Online Store 2.0 theme development, Liquid, PHP (CodeIgniter/Laravel), MySQL, and REST APIs with a proven background in both corporate software engineering and client-facing freelance projects.

## // WORK EXPERIENCE

### Shopify Developer — Nolters Gold

Onlinejobs.ph / Freelance (Part Time) · September 2026 – Present

- **Full Store Ownership:** Proactively audit the website to identify performance bottlenecks, UX friction points, and opportunities for conversion optimization.
- **Feature Development:** Design and build dynamic, custom Shopify features to enhance customer experience and boost store conversions.
- **Performance & UX Optimization:** Continually optimize theme code and site speed to ensure seamless browsing across all mobile and desktop devices.

### Shopify Developer — Mea Suit

Onlinejobs.ph / Freelance (Project-Based) · April 2026 – June 2026

- **OS 2.0 Modernization**: Migrated static Liquid to JSON templates with custom schema settings, giving the merchant 100% editor control.
- **Custom App & Growth**: Built a Size Finder app and dynamic Giveaway Form using Metafields, driving an 89% increase in traffic and conversions.
- **Performance & Savings**: Eliminated third-party app dependencies ($0 monthly app fees) and improved site loading speed by 85%.

### Full-Stack Developer — Arkonor LLC

Onlinejobs.ph / Freelance (Part-Time) · 2023 – 2025

- Engineered a custom CRM system from scratch using PHP (CodeIgniter) & MySQL.
- Designed relational database architecture, backend REST endpoints, and secure role-based access control.

### Web Developer / Software Engineer

Captivate Group Corporation · 2021 – 2024

- Developed and maintained multiple custom web applications for core business operations using PHP and MySQL.
- Built backend data pipelines, optimized complex SQL queries, integrated responsive front-end UIs, and API integrations.

### IT Staff / Web Developer

Fujitsu Die-Tech Corporation of the Philippines · April 2018 – December 2020

- Built internal web applications and central databases using PHP, MySQL, and JavaScript to automate manufacturing and administrative operations.
